THREE GENERATIONS OF BOYDS

67 Years of Continuous Service to Our Customers, 1887-1954

J. H. H. BOYD
Grandfather of Boyd Bros.

It is with great pleasure that we herewith present our catalog for season 1954. First of all, we want to extend greetings and best wishes for a prosperous year in 1955 and to thank each and every one of our customers for their patronage during the past and hope that we may have the pleasure of receiving your valued orders for the coming year.

Those who have known and bought from the "Boyd's" in the past, many for a long term of years, of course, need no introduction. To those unacquainted with us we are glad to give the following bit of information.

Back in the year 1887, J. H. H. Boyd, the founder of our business, father of F. C. Boyd and grandfather of the Boyd Brothers started gathering and selling tree seeds and soon after began gathering native trees and shrubs and growing them in the nursery. There were few schools at that time in the Cumberland mountains, and little opportunity to attend, so his education was the result of his own efforts. His intimate and life-long association with trees and plants, together with his interest and accurate and correct knowledge, made him a leader in the growing of nursery stock. He died in 1924.

F. C. Boyd, the father of Boyd Brothers, followed in the footsteps of J. H. H. Boyd, advising and training his sons for the years ahead.

In 1930 he purchased a farm just outside the city limits of McMinnville, where Boyd Nursery Company operated until 1948—due to the expansion of McMinnville it was decided to move the nursery five miles farther out, on Highway 55-A, and the old farm is being sub-divided into building lots. A larger farm of new land was purchased where the expansion program could go forward.

F. C. BOYD
CHAIRMAN OF THE
BOARD
Father of Boyd Bros.

BOYD BROTHERS

In 1948 F. C. Boyd decided to turn the active operation over to his sons, who are trying their best to carry on the work that their father and grandfather has developed.

The excellent growing conditions and our increased acreage enable us to offer this season the finest and most complete assortment of nursery stock we have ever had.

We have many customers over the country that have been sending us their orders from year to year, and we are proud of them, and trust we may add you to our growing list of pleased customers. Of course, our reputation depends on the class of plants we send out, and the service that we render.

All packing and shipping of orders is personally looked after by competent help; shipments are put up in the best possible manner, and stock is packed for long distance shipments.

SHIPPING SEASON—We usually begin digging and shipping nursery stock October 10th and with slight interruptions during the bad weather we ship all winter up until May 1st.

To our old, new and prospective customers, the Boyd Nursery Company wishes you a very satisfactory and profitable nursery season.

Cordially yours,

A Nice Block of American Sycamore

PLATANUS OCCIDENTALIS, Planetree, Sycamore, American

Also known as Buttonwood. A large and lofty tree with massive branches and picturesque white or gray bark. Rapid-growing, an excellent street and park tree, especially valuable for city planting because of their resistance to smoke and gases.

This block of sycamores are some of the nicest we have ever grown.

Rosa Multiflora

Thorny Rose

Millions planted annually by U. S. Soil Conservation Service, State Game Commissions, hunt clubs, and farmers all over the country. Makes excellent game cover and provides winter food for song and game birds.

Attractive plants grow 6 to 8 feet tall and nearly as wide. Sprays of white flowers with yellow stamens cover the plant in June. Excellent foliage holds well and in fall a liberal crop of red berries or "hips" is produced. Planted 1½ to 2 ft. apart as an informal hedge for larger areas, assures privacy. May be clipped more formally to isolate smaller areas.

Recommended by U. S. Dept. of Agriculture and State extension services. Many farmers are using as permanent fences at one-third the cost of woven wire. So bushy and thorny it furnishes a stock-tight, human-tight fence which beautifies the surroundings and tends to keep down weeds. A good snow barrier, windbreak and soil erosion control, too. Does not rob the soil beyond its own branch spread. Plant 1 foot apart for fence; 3 to 5 ft. apart for game cover and naturalizing.
